KW	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36	37	38	39	40	41	42	43	44	45	46	47	48	49	50	51	52

1. The respective production weeks for the profiles can be seen in the respective CW (column).
2. For orders larger than 500 m² per product/position, an order (Fridays at the latest) is accepted for the next-but-one calendar week without consultation (for standard products, subject to the availability of materials). However, these must be called 4 working days (see Point 4) before the desired collection date.
3. For orders smaller than 500 m² per product/position, please enquire about the production date.
4. Orders larger than 500 m² per product/position are only manufactured on prior call, at least 4 working days (excluding Saturdays) before the desired collection date.
5. Confirmed orders smaller than 500 m² per product/position are ready for loading on the following Monday for the confirmed production week. All completely manufactured orders are reported independently by us as ready for despatch.
6. All released and manufactured orders (smaller than 500 m²) must be taken over at the latest 5 working days following the call date (and/or production week). After this, the orders are stored for a fee.

Subject to change.
